ENTERPRISE AI SEARCH INTELLIGENCE

AI Visibility Report

A Comprehensive Audit of AI Search Engine Indexing & Readiness

AUDITED WEB ASSET DETAILS

Target Website:	https://example.com/future-of-aeo
Root Domain:	example.com
Generated Date:	13/7/2026 at 12:38:21 pm
Report Version:	v1.0.0 (Executive Edition)

Executive Summary

AEO Readiness Score:	92%
Executive Grade:	A
Best Platform:	Gemini (97%)
Lowest Platform:	Perplexity (84%)
Platforms Checked:	7 Platforms
Visibility Status:	Optimal Presence

KEY RECOMMENDATION SUMMARY

- Strengths: **Heading structure and text readability scores conform to LLM layout requirements. Crawlability flags are clear.**
- Weaknesses: **Structured schema tags (FAQ and Org metadata) are lacking. Outbound citations could be increased to back up claims.**
- AEO Directive: **Prioritize structured FAQ lists to increase citation frequency inside Gemini and ChatGPT Search summaries.**

Page Content Overview

The content readability and formatting represent the core foundations analyzed by Answer Engines to verify E-E-A-T credentials.

WORD COUNT	READING TIME	CONFIDENCE	LANGUAGE

AI Search Platform Breakdown

Platform Visibility Index Comparison

Platform Optimization Details

● ChatGPT Search

EXCELLENT

Optimized formatting check. Highlight clear entities.

● Google AI Overview

EXCELLENT

Match exact search context parameters.

● Google Gemini

EXCELLENT

Structured schema and E-E-A-T signals required.

● Perplexity AI

EXCELLENT

Embed academic citation links in footer.

● Anthropic Claude

EXCELLENT

Write thorough structural paragraphs.

● Microsoft Copilot

EXCELLENT

Incorporate structural bullet summaries.

Auditor Suggestions & Remediation

The auditor has compiled structural optimization opportunities. Resolve these layout issues to increase search index priority.

[LOW]

Formatting

Incorporate schema structured JSON-LD implicitly.

Semantic Gap Analysis

Missing Target Keywords

Incorporate these key terms inside page headings (H2/H3) to capture exact search intent query clusters:

- structured schema
- LLM retrieval

Topical Coverage Gaps

Add paragraphs discussing these topics to enhance semantic density:

- RAG vector databases

Recommended Optimization Actions

- ' Incorporate table elements detailing performance stats.
- ' Explicitly cite academic research links.
